

Audio-Visual Requirements

Eddie LeMoine

The following audio-visual requirements are provided to ensure a smooth, professional, and high-quality presentation experience for your event.

1. Projector and screen (Speaker uses a MacBook Pro computer with HDMI adapters)
2. Sound capability for the Speaker's laptop (headphone jack)
3. The Speaker arrives equipped with a versatile wireless microphone that connects seamlessly to the venue's system via an XLR cable. The microphone is designed for broad compatibility, and a range of adapters ensures functionality with most wireless transmitter brands. If the venue provides a wireless lapel microphone, the Speaker's gear includes suitable adapters for leading brands such as Audio-Technica, AKG, Sennheiser, and Shure, ensuring a smooth and hassle-free audio experience.

If the AV provider for your event has any questions, please do not hesitate to contact Eddie directly at eddie@eddielemoine.com. We are committed to providing the highest-quality presentation experience and welcome any suggestions from your technical team.
